

Step 6: Create Action Plan and Define Activities

Measuring the intervention will tell you where to focus and allocate resources in the future.

- For each selected intervention write a 1-3 sentence description of what you propose to do.
- What is your prediction of what will happen as a result of this intervention?
- How will you measure the effectiveness of this intervention?
- How will you track your progress?
- What processes will you need to leverage, enhance, or develop?

EXAMPLE: Professional Education

We will educate 80% of the clinic staff (potential reach: 15 providers and 25 support staff) at the 5 lowest performing clinics in Omega county by April 15, 2021. We will track progress by capturing registrations and attendance at the education sessions.
